

Helps redistribute pressure on the patient.

Orange Aid® Gel Pads and Positioners are latex free and specifically designed to distribute pressure, heat and improve positioning. Orange Aid® stands up to the rigors of the OR environment and can be kept clean with the use of standard hospital-grade cleaners and disinfectant. The bright Orange color prevents inadvertent disposal.

WHAT THE LITERATURE SAYS:

"The goal of any positioning equipment is to use equipment that is designed to redistribute pressure and that decreases the risk for positioning injuries."

- 2012 AORN Perioperative Standards and Recommended Practices

"Use a pressure-redistributing mattress on the operating table for all individuals identified as being at risk of pressure ulcer development."

- Pressure Ulcer Prevention and Treatment Clinical Practice Guideline

- February 2010, NPUAC

"Padded Armboards may decrease the risk of upper extremity neuropathy"

"The use of chest rolls in laterally positioned patients may decrease the risk of upper extremity injuries."
